

Title: Fit Track

Names: Zachary Chommala, Jonathan Phouminh, Laura Beisser, Wayne Wood, William Anderson

Project Tracker: Trello, and GroupMe

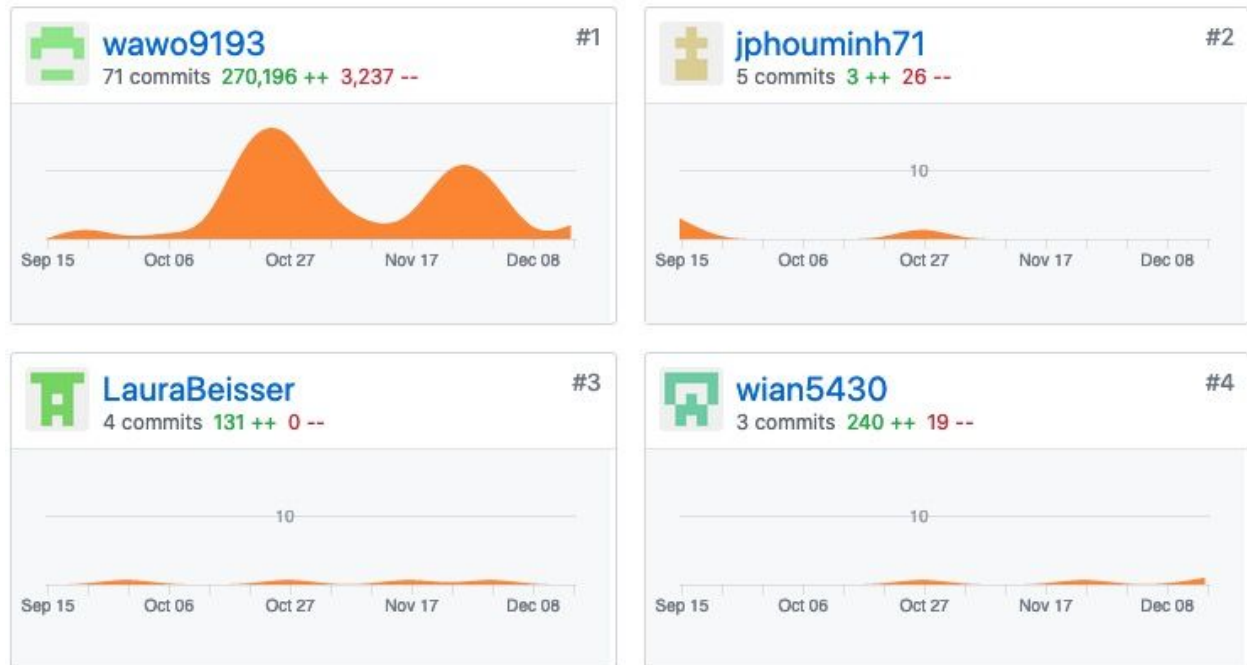

Link to Trello: <https://trello.com/b/AfTDxXsL/fitnessproject>

Link to github: https://github.com/jphouminh71/csci3308_fall19

Contributions listed on GitHub:

NOTE: Contributions are not completely accounted for on the graph which wasn't solved by adding other email accounts to github profiles. Proof of this can be seen when on the "commits" tab on the github repo (missing 60+ commits). Image of github's lacking graph below.

Deployment: Our method of deploying our application was through heroku cloud. We chose this because it was taught in recitation and was the easiest way to deploy a live working demo.
